JORGE ANTONIO GARDUNO BRINGS A SAFARI BACK TO LIFE IN LEON GTO, MEXICO

León Gto, November 20 th, 2003

Hello David !!

I did not write before maybe because I did not have the time to do it.. (I am not sure about this)

Well, here in my town (León Gto , México), I have had a really good experience with my SAFARI (thing 1976), it is now red color - it was in really, REALLY bad condition before I restored it. If somebody has a car in really bad condition, I recommend not to lose hope !! It has taken me two years for the total restoration and I now have it finished.

It is really interesting because you have to work a lot, ... looking for the spare parts all over the world, plastic parts, here,... there, the Internet, interchanging with some people that you find out on the street...

So I can tell everybody that I am fall in love now..! (see picture Super Safari)

I belong to a Mexican club (big one) and we share our really nice experiences and exchange ideas. It is in Mexico City. (I live 4 hours out of Mexico City). Some of the members have a subscription to thing Stuff too !!

Here in León, we are forming a new club, we are 6 Thingers Safarimanos en León

Today I was reviewing and checking some articles about things (I spent a lot of my afternoons doing this), Tomorrow, Saturday, I have a meeting with my friends (with things or SAFARIS of course) so we will review the Thing Stuff magazine as well together.

I really enjoy the magazine and I want to share my thing (Super thing) with all Thingers (SAFARIMANOS) around the world, ...

Best regards

I hope you have a really good thing!!!

Jorge Antonio Garduño
León Gto, México.
